

# THE POWER TO CHANGE

Legrand Flexible Power Solutions for Educational Space Reentry

**PERFECT FOR:**

- K-12 schools
- Higher ed campuses

## Come back with power.

Educational spaces will never be the same again. With new regulations and requirements due to the COVID-19 pandemic, many facilities need to make quick changes right now. Even with so many unknowns about long-term planning, there are many ways to reconfigure spaces so that they're safer immediately.

# Use it or *lose it.*

## Spending your funding now.

With the CARES Act of 2020, CRRSA Act of 2021 and ARPA of 2021, many educational facilities have large amounts of funding available—but if you don’t spend it soon, it will be sent back to the government. To address any learning setbacks from the COVID-19 pandemic, these acts support the use of funding for social distancing needs, PPE, hybrid/remote learning and teaching, cleanliness, safety and more. Many Legrand solutions qualify for this funding, and it’s now or never. Provide desktop outlets for every student, permanent power for outdoor classrooms and touchless lighting control for high traffic areas. Work with your Legrand rep to learn more about your options.

## Touchless or tough options for a cleaner space.

As people return to schools, take new precautions wherever you can to ensure a safe, productive space. On top of establishing new recommendations for hygiene, you can quickly install electrical devices that are touchless or built to withstand harsh cleaning agents. ***Click on the product name to learn more.***

### ADORNE® WAVE SWITCH

Lights on with the wave of a hand or just by walking in. These easy, hands-free technology switches are perfect for commercial spaces like conference rooms, classrooms, breakrooms and patient waiting rooms. Installs in under 15 minutes, fitting into existing electrical boxes. No new wiring required.

### WIRELESS CHARGING PUCK

A full phone charge from right in the table. Turn any table or desk into a smart wireless charger. After an easy DIY installation, it sits flush against the surface for a truly seamless solution. Provide speedy Qi certified wireless charging for users looking to recharge their smartphones and tablets. Installs above or below the furniture surface.

### CHEMICAL RESISTANT SWITCHES & OUTLETS WITH STAINLESS STEEL WALL PLATES

Step up electrical safety. Swap out regular electrical wiring devices for ones designed to withstand harsh cleaning agents and chemicals. Make the switch quickly with easy installation into existing electrical boxes.

# Reorganize the space.

With many unknowns, every facility needs to be able to move quickly and respond to ongoing layout changes. Even if you're not sure how a space may be used in the future, it's safe to assume that social distancing will continue to be important. Explore power options that can be installed and removed easily—indoors or out. Strategically redesign spaces with lower density, providing everyone with their own power source. **Click on the product name to learn more.**

## ANYWHERE POWER

Run power to where it's needed, no matter the distance. Set up power stations in breakrooms using Plugmold strips spaced six feet apart. Explore the floor with Connectrac wireway that adapts to changing layouts. With carefully placed power poles, you can space people apart as much as you need.

- 500/700 SERIES SMALL RACEWAY
- POWER POLES & COLUMNS
- CONNECTRAC      ▪ PLUGMOLD

## FURNITURE POWER

Give everyone an outlet, even if desks move around. Install units directly into furniture for convenient power and charging access. Available with traditional power outlets and USB-A/USB-C ports. Perfect for desks, tables, seating and more.

- DESKTOP POWER CENTER SLIM
- ROUND FURNITURE POWER CENTER
- MODPOWER™ SYSTEM

## OUTDOOR POWER

Outdoor spaces are perfect for socially distanced learning. Bring power and charging to those that want to maintain six feet of separation, get work done and enjoy some fresh air. Safe all year round. Options include traditional power outlets and USB charging ports.

- OUTDOOR CHARGING STATION
- OUTDOOR POWER PEDESTAL
- OUTDOOR GROUND BOX

## CABLE MANAGEMENT

Power systems are intricate, and cable management can be tough to maneuver if you opt for conduit. An open system of wire mesh cable tray is much easier to install, move and reconfigure as your building adapts to the new normal. At individual workstations, directly mount G-Tray underneath any desk or table to keep cords and cables organized.

- WIRE MESH CABLE TRAY
- G-TRAY & G-MINI CABLE TRAY

*As we learn about additional changes to the modern educational space, we continue to enhance our product portfolio and services.*
